

Launch Complete

Superior Student Experience + Simple Course Material Management

The student course materials experience has gotten messy. Some digital course materials are available in the Learning Management System (LMS) on day-one, while other print and digital materials require purchase from your campus store or other online retailers.

Bring it all back together with **Launch Complete**, a comprehensive and personalized course materials experience for every student.

Launch Complete combines retail offers from your store's e-commerce system with Inclusive Access titles in a single LMS-based experience, so students can access, shop, and record opt-in/opt-out decisions for their course materials in one fell swoop.

Student Benefits:

- Students visit a single, central location inside the LMS to discover 100% of adopted course materials
- Students' personalized booklist provides instant access to some materials and fast, transparent comparison shopping for everything else
- Inclusive Access items are available to access on day one with simple opt-out tools within the LMS

Campus Benefits:

- Give exposure to both digital and print course materials through use of a central location
- Create a virtual student shopping experience inside the center of the student ecosystem, the LMS
- Establish another touch point to maintain HEOA compliance for your institution
- Streamline processes with one global link installed in the LMS

Technical Requirements:

- An LTI-compliant LMS with the VitalSource LTI tool installed
- Verba Compare integration with your retail management system
- Verba Connect integration with SIS enrollment flowing

No one cares more about your campus community than you. **Launch Complete** helps you simplify course materials management while staying independent and in control
